Welcome to DNATraits

DNATraits specializes in DNA testing to identify genetic disorders and susceptibility to inherited diseases and characteristics. DNATraits offers the most extensive and least expensive tests in the world, complete with a free consultation both prior to and after testing. Whether you are starting a family now or in the future, are concerned about a hereditary disease, or want to determine your risks for certain medications (coming soon!), contact DNATraits today and discover the science of better living.

Is your family more
or less likely to carry
the gene associated
with Sickle Cell Anemia

[Learn more](#)

How can you ensure
your family's health
and future today?

It's all just a test away.
